Contract ED-91 with the [REDACTED]

Engineering Staff

REF: Inventory Schedule B, Reference No. H-2061 dated 19 May 1959

1. The referenced inventory schedule, [REDACTED] No. H-2061, has been carefully reviewed by the Engineering Staff. The item in question, an antenna array, was one of two fabricated for use in connection with the marine crystal video receiver, CM-3, which was delivered for field operation in 1957. Performance of the antenna at that time was satisfactory, but subsequent technological advances of the last few years have obsoleted this equipment. There is no requirement at this time for an antenna of similar design, nor is there expectation of such a requirement in the future.

2. In view of the fact that the antenna is not regular stock, and appears to be of little value to the [REDACTED], this office recommends that the interest of the Government could best be served by disposal of the item in question by any methods deemed feasible by the Contracting Officer.
